Operating Instructions

Temperature Settings

The default temperatures are 88°F for High and 79°F for Low.

- Above the High temperature the unit displays Red.
- Between the High and Low temperature the unit displays Yellow.
- Below the Low temperature the unit displays Green.

To change the set points for High and Low:

- Press and hold the SET button until the display begins to flash.
- Then, press either the “+” or “-” sign buttons to adjust the High setting.
- Next, press and hold the SET button until the display begins to flash.
- Then, press either the “+” or “-” sign buttons to adjust the Low setting.
- Finally, press the SET button one last time to finish.

Fahrenheit to Celsius

Press the SET button for a moment, and the display changes between Fahrenheit and Celsius.

Multiple Units

The unit is powered with a simple USB power adaptor and up to 10 units can be daisy-chained to a single power adaptor.

208V

A C14 Male to Nema 5-15R Adapter is available for sites that do not have 110V power available.
