

## Aluminum Structural Grid System for Data Centers

### Polargy Universal Ceiling System

The PICS Global™ Structural Ceiling is a single solution for Imperial or Metric threaded rod connections. With a continuous support channel along the bottom of the grid, a PICS Global™ structural ceiling provides ease and flexibility in deploying infrastructure. Its simple yet economical design makes it easy to install and configure.

### Strongest System

- Highest load capacities available.
- Bottom channel connections are stronger than typical threaded slot connections.

### Benefits and Details

- Hanging loads can be connected with either Metric or Imperial hardware.
- 3/8" & 1/2" or M10 & M12 threaded rods can connect to the bottom channel.
- Deployment options of 4'x6' supports for typical loads or 4'x4' supports for heavy loads.
- Custom sized ceiling tiles and light fixtures available.
