PolarPlex™ P2 Swing Doors come standard with multiple mounting options to install easily in a variety of situations.

Simple Solution

Polargy's PolarPlex™ P2 Swing Door is a sturdy, economical Aisle End Containment Door with twin-wall polycarbonate insert panels that let light through while keeping weight down. Other clear panel inserts also available. Door frames are constructed with tube steel for structural strength. PolarPlex™ P2 Swing Doors fit standard 42U racks and 48" aisles.

Designed for Flexibility

PolarPlex™ P2 Swing Doors easily accommodate a variety of installation scenarios. Side and top flanges are included for mounting to racks, walls or Unistrut. Mounting flanges match standard standard Unistrut pieces to fit tight and look clean. Vertical support posts are provisioned with pem nuts on the side offering an alternative anchor point for mounting brackets if door foot pad mounting holes are obstructed.

Start with Polargy. Finish on plan.
