Tool-Less Rack Top Baffles

An economical, quick-to-install option for open top containment architectures. These light weight Rack Top Baffles attach with neodymium magnets for a sturdy installation that is quick, tool-less and easily removable.

Key Benefits

- Increase set points and/or turn off cooling units or reduce fan speeds to save energy.
- Support higher rack densities.
- Deploy containment in a matter of minutes and at lower initial cost than traditional containment.

Key Features

- Baffles can be configured for vertical or 45° angle applications as needed.
- Custom sizes as well as standard SKUs for easy ordering of typical sizes.
- Attaches directly to rack top with magnets.
- Integrated J-Hook for tool-less SPS™ InFill Panels for gaps between racks.
- End cap options with baffles of up to 76" wide.
- Baffle twin wall material can easily be notched around obstructions.
