- Qty (2), Brackets for alternative attachment methods

Tools Required

- Powered Drill
- 3/8" Hex Socket
- Phillips Bit (for removing the shipping brace)
- Level
- Tape Measure

PolarSlide™ Sliding Door Installation Guide

STEP 1 | Receiving and Handling

- The PolarSlide™ Door arrives fully assembled.
- The door's polycarbonate inserts come with **protective film** to prevent damage and scratches. Leave this film on until installation is complete.
- The PolarSlide™ Door arrives with a **shipping brace** attached across the frame bottom to maintain correct dimensions and to minimize bending during shipment and installation.
- The shipping brace is attached to the door guides. Do not remove shipping brace until after the door is installed.
- NOTE: Door panels can open and close with shipping brace attached.

Shipping brace along bottom of door

Shipping brace is attached to the door guides with two screws

STEP 2 | Door Top/Header

- Position the door and make sure it is plumb, level and square.
- Primary Attachment: Use slots provided in the header flange and the ¼-20 self-drilling screws to connect header to the racks or supporting infrastructure.
- Alternate Attachment: In the event header slots can't be used, use the screws and the two brackets to attach posts to the racks and/or supporting infrastructure.

NOTE: Do not drill into header (top 2" of the frame), this will interfere with self-closer.

Primary attachment method

Alternate attachment method

STEP 3 | Door Bottom/Floor Bracket

- The PolarSlide™ Door has bottom footpad mounting holes for easy floor attachment. Connect door to the floor using the ¼-20 screws.
- Measure door diagonally to ensure the frame is still square before fastening to the floor. Make any adjustments if needed.
- Primary Attachment: Use the ¼-20 self-drilling screws to make floor connection.
- Alternate Attachment: Use the ¼-20 screws and two brackets to attach posts to the racks and/or supporting infrastructure.
- Remove the Shipping Brace.
- Remove the protective film from polycarbonate inserts.
