Low Cost, Rapid Install Cabinet Chimneys

Flat-Pack Server Rack Exhaust Chimneys

Polargy's Flat-Pack Family of containment solutions includes a rack-based chimney option. These exhaust chimneys are packaged in flat kits that field assemble in just minutes. The clear multi-wall polycarbonate panels allow light to pass through so that rows of cabinets with chimneys have a minimal impact on the data center lighting. Rack top attachments are made with strong neodymium magnets making the installation tool-less and quick. All chimneys are custom sized to the project.
