

PolarPlex™ PX Swing Door

Aisle Containment Door

The PolarPlex PX Swing Door is an attractive all aluminum door that fits a wide variety of site conditions, assembles quickly, and installs easily.

Pre-Assembled

Anodized Aluminum

Side Lights

Elegant, Efficient Design

This PX Swing Door is an economical aisle end option for hot and cold aisle containment. There is no threshold, which eliminates any tripping hazard and allows for easy movement of carts through the doorway. The door is constructed of an attractive anodized aluminum with a door width of 36" and overall width of 54". The door can be configured to open to the left or the right depending on facility conditions and aisle configurations. The side light can be configured for either side of the door. The door panel insert options are clear, 8mm twin-wall polycarbonate, and FM4910.

Fast and Easy to Install

The PX Swing Door is delivered completely assembled which makes the installed go quickly and smoothly. The door size is 54" wide by 7' tall. Optional header and side extensions are available for taller cabinets or for aisles wider than 54".
