COOL™

### 42U, 45U and 48U Sizes

### “Server Images”, All White, All Black and Custom Art Styles

### Full Rack Length Blanking Panels

PolarFlex™ is rack blanking for empty racks and large unfilled spaces. Data centers often house rows of racks that remain unpopulated for some time, and with high-density IT equipment, some racks will be only partially filled. For empty or partially filled racks, thin and flat PolarFlex™ blanking panels are a convenient and cost effective alternative to buying, installing and storing hundreds of 1U or 2U molded plastic rack blanks.

### Product Details

With the Server Images, All White, All Black and Custom Art style options, PolarFlex™ panels complement the aesthetic of any data center. Panels are easily trimmed with scissors, so re-sizing the panels as empty racks become filled is easy. 42U, 45U, and 48U Sizes. Made of UL-94-VO fire-rated Lexan film. Panels packed in boxes of 10. Rivets and screws packed in bags of 50.
