

PolarPlex™ Containment Curtains

Brochure

PolarPlex Curtains and Strip Doors

Polargy's PolarPlex Strip curtains and softwall panels are an effective, low cost solution for hot and cold aisle containment. The curtains install quickly, seal well, and are a durable solution for isolating hot exhaust air from cold supply air.

Quick, Pain-Free Installation

The PolarPlex Curtains and Strip Doors install rapidly and with little site disruption. The modular, fast mounting system accommodates site variations and saves on installation labor. Mounting channels attach quickly and easily to the T-bar grid with Polargy's special "P-Clip". Then the curtains, which feature a hookbead mounting lip, are simply and securely hooked onto the aluminum mounting channel.

Easy T-Bar Mount "P-Clip"

Fast Mounting System

The mounting channels are clear, anodized aluminum available in either Flat Wall or Angle Mounting forms.

Vinyl Options

Polargy's vinyls are formulated to be fire-retardant and low-outgassing. Two fire rating options are Class A and Class C, both are ESD safe.

Custom Sizes

Curtains are available in 8" wide pieces for strip doors and are available in wider panels for above rack containment. All curtains are cut to length for each unique site and rack height.
